

## Videoconference

# Management of the Logistics Chain and the Single Window

### Contents:

The program is supported in the skills needs identified among the stakeholders of the project TrainMos 2 in particular with regard to the logistics chain and operations efficiency related to maritime transport and intermodality.

### Focus on:

- Focus and reflect on the critical success factors of the supply chain in relation to maritime and intermodal transport
- To distinguish and characterize the management and control systems of maritime international logistics
- Identify the principles and procedures of the Single Window Directive and reflect on the associated constraints and opportunities
- Distinguish information management systems and the rules and procedures in the production of information

### Module attendees

For professionals from different sectors in the multimodal transport chain, the course favours a training methodology focused on "solving problems" and is anchored in the participant's context of intervention using active methods and techniques.

### General information:

- Dates: from 12<sup>th</sup> October 2015 to 16<sup>th</sup> October 2015 and from 19<sup>th</sup> October 2015 to 20<sup>th</sup> October 2015
- Time: from 15h to 19h UTC/GMT + 1 hour
- Duration: 35 hours
