

## Videoconference Management and Development of Intermodality and Maritime Transport

### Contents:

This course favors a training methodology focused on "solving problems" and is based on the skills needs identified among the stakeholders of the project TrainMos 2.

### Focus on:

- Focus and reflect on the problems and challenges of intermodality and the logistics associated with the use of maritime transport;
- Identify and characterize the key variables of the supply chain;
- Identify the key challenges faced by the supply chain management.

### Module attendees

This program is conceived for managers and technicians from export/import companies (shippers) and other professionals from other entities (port operators, port authorities, etc.) interested in developing their knowledge concerning maritime and intermodal transport.
